PROFILE

Final-year engineering student in IT Security (FST Marrakech, Cadi Ayyad University), seeking a final-year internship in cybersecurity to put my skills into practice within an expert team. Combining rigorous practice in offensive and defensive security, network security, incident detection and investigation (SIEM, SOC), and malware analysis. Rigorous, curious, and eager to learn more.

EDUCATION

Engineering Degree — Information Technology Security | *FST, Cadi Ayyad University, Marrakech* *2024 – Present*
DEUST MIPC *(Mathematics, Computer Science, Physics and Chemistry)* | *FST, Cadi Ayyad University, Marrakech* *2022 – 2024*
International Baccalaureate — Mathematical Sciences B | *Lycée Abi El Abbas Sebti, Marrakech* *2022*

PROFESSIONAL EXPERIENCE

PFA Internship — SOC Operations, SIEM & Threat Detection | ***Securozen, Remote*** *Aug – Sept 2026*

- Automated security log analysis (parsing, IOC enrichment, event correlation) to generate MITRE ATT&CK-mapped incidents.
- Implemented attack-path prediction with risk scoring to assess potential lateral movement and impact across enterprise assets.
- Integrated centralized SQLite storage, a REST API, a monitoring dashboard, and automated incident reporting.
- Validated the end-to-end detection pipeline using real authentication logs generated in an isolated lab simulation.

Introductory Internship — Web Development & IT Security | ***ORIENTAL GROUP, Marrakech*** *Jun – Jul 2025*

- Contributed to the website's security assessment and identified risks related to the themes, extensions, and components used.
- Implemented application security best practices and configuration hardening to reduce the attack surface.
- Participated in remediating identified issues, strengthening the website's reliability and security.

PROJECTS

DNS Exfil Detect | *Python · Scapy · Scikit-learn · SQLite* — DNS_Exfil_Detect

- DNS tunneling detector combining a rule engine and an ML model (RandomForest/XGBoost) on per-query and sliding-window features; SIEM export (CEF/syslog), REST API, monitoring dashboard.

Yara-Triage | *Python · YARA* — Yara_Project

- Static malware triage tool: hashing, PE structure analysis, IOC extraction, YARA rules, and an explainable risk score mapped to MITRE ATT&CK.

Threat Hunting Library | *Sigma · Splunk/KQL/EQL* — Threat_Hunting_Library

- Library of ten MITRE ATT&CK-mapped hunts with Sigma rules, cross-platform queries, and an automated validator.

Python Security Toolkit | *Python* — Security_Toolkit

- Authentication log analyzer, network scanner, directory brute-force, password strength checker, file encryption tool.

Secure Enterprise Network Architecture | *pfSense · OpenVPN · Suricata · VirtualBox*

- Deployed a segmented network infrastructure (DMZ, NAT): pfSense firewall, site-to-site OpenVPN (TLS/certificates), Suricata IDS/IPS, hardened Apache and vsftpd services.

Windows Server 2019 Administration | *PowerShell · DHCP · DNS · IIS*

- Managed local accounts/groups and role-based NTFS permissions; deployed DHCP, DNS (forward/reverse zones), and IIS roles.

Zero-Knowledge Proof — Applied Cryptography | *Kali Linux*

- Implemented a Zero-Knowledge Proof protocol and simulated a replay attack to validate the cryptographic robustness of the authentication scheme.

SDN (Software-Defined Networking) | *Packet Tracer*

- Define and Designed an SDN architecture separating the control and data planes, simulated in Packet Tracer.

TECHNICAL SKILLS

Offensive & Detection: Ethical hacking, vulnerability analysis, malware analysis
SOC & SIEM: Splunk, alert investigation, log analysis, phishing email analysis, Threat Intelligence
Networking & Infrastructure: TCP/IP, firewalls (pfSense), VPN (OpenVPN), IDS/IPS (Suricata), DMZ/NAT, encryption (TLS)
Systems & Identity: Linux (Kali, Ubuntu), Windows Server, Microsoft Entra ID (identity & access management)
Programming: Python, Shell/Bash, PowerShell, PHP/Laravel, Java, JavaScript

CERTIFICATIONS

ISO/IEC 27001:2022 Information Security Associate (SkillFront) · Cybersecurity Fundamentals (IBM)
Cisco: Networking Devices and Initial Configuration · CCNA: Introduction to Networks · Python Essentials 2 · Cyberthreat Management · Network Defense · Endpoint Security · Ethical Hacker · Junior Cybersecurity Analyst

LANGUAGES & STRENGTHS

Languages: Arabic (native) · English C1 (EF SET) · French B2+ (Lenguia) | **Strengths:** rigor, curiosity, autonomy, teamwork, Punctuality
